with years of experience in B2B/B2C products, proficiency in design systems, and a proven track record in creating cross platform experiences; seeking a challenging collaborative environment to create exceptional products based around user centered design. Currently doing masters in in London, UK

Experience

User Experience Design for **Tangent Technologies**

June 2022- Sep 2023

- Collaborated on numerous projects throughout my time, engaging with developers and stakeholders from diverse global product portfolios.
- Crafted both low-fidelity and high-fidelity prototypes to visualize and assess various design concepts, actively incorporating user feedback and conducting usability tests to enhance the product's user experience.
- Fostered close collaboration with engineering teams, product managers, and key stakeholders to maintain alignment between the design vision and technical feasibility while meeting business requirements.
- Presented progress updates and design iterations during weekly design reviews, ultimately culminating in a final presentation to the Director of Design, highlighting the evolution and success of Products.

UX/UI Intern for **Codematics**

Dec 2021- June 2022

- Conducted competitor analysis, offering insights into strategies and market positioning.
- Led research efforts, including market research and staying updated on industry trends.
- User testing, gathering valuable feedback for product enhancements.
- Contributed to UI design for applications, dashboards, and websites.

Freelance

2019- 2021

Before my internship, I worked on part-time projects while studying to learn about UX design. Initially, I teamed up with friends to create utility applications. I'm still taking on part-time freelance projects as I continue to grow in UX design.
